

Web Applications

Web TimeCapture

Capture Time Via Internet

Web TimeCapture is a browser-based attorney productivity tool that allows timekeepers to capture their time via the Internet. Use any computer with a web browser and an Internet connection to securely enter and validate time directly into Omega Legal no matter where you are.

You can also review all of your past time entries made each day in Calendar view. To drill down to specific individual time entries made on a particular day, just double-click the day to see them in Time Sheet view.

Ideal for Business Travelers

Stuck at the airport? Killing time in your hotel room at night? Or perhaps enjoying a soothing cup of java at a local coffee shop? Downtimes are a good time to enter

your time into Omega Legal. All you need is a computer with a web browser and an Internet connection (including thousands of wireless hotspots at airports, hotels, Starbucks and more).

Working on site at a client's office? Use your own laptop or any other computer to enter time. You can also access information on matters, attorneys, and task and activity codes to make your time entry easier. Web TimeCapture uses the user profile security settings and validates time entries upon saving. It's also platform independent, so it works with any operating system, including Mac.

Remote Office Solution

Web TimeCapture can also be an economical solution for smaller regional or satellite offices to enter time directly into the Omega Legal database. Install Web TimeCapture on the Omega Legal server and give access to off-site attorneys to enter time—no additional software is required.

Features & Benefits

- Use any time, anywhere with Internet access
- View critical client information quickly
- More complete time capture
- No lost hours due to faulty memory
- Economical solution for regional offices
- Any web browser
- No additional software needed for remote offices

Web MatterInquiry

Access to Critical Information

Omega Legal's Web MatterInquiry is a comprehensive application that can be launched from any computer with an Internet connection and a web browser. Attorneys have instant access to review everything they need to know about a client in one easy-to-read screen.

webMatterInquiry

Matter ID: 1000-00033 | Sale of Del Rio Property | New Matter

Last Statement	10-03-08	
Adv. Dep. Balance		\$ 507.50
Trust Balance		\$ 5,000.00
Total Discount		\$ 0.00

Work-In-Process Information

	Total	Fees	Costs	Interest	Retainer
Current WIP	\$8,938.16	\$6,046.00	\$2,892.16	\$0.00	\$0.00
A/R Balance	\$20,705.55	\$20,148.50	\$557.05	\$0.00	\$0.00
Total Billed	\$28,513.05	\$27,856.00	\$657.05	\$0.00	\$0.00
Total Paid	\$7,557.50	\$7,457.50	\$100.00	\$0.00	\$0.00
Total A/R W/O	\$250.00	\$250.00	\$0.00	\$0.00	\$0.00
Total Wip Cost W/O	\$5.00	\$0.00	\$5.00	\$0.00	\$0.00
Total Fee Mark Up	\$1,016.25	\$1,016.25	\$0.00	\$0.00	\$0.00
Total Fee Mark Down	(\$15,347.75)	(\$15,347.75)	\$0.00	\$0.00	\$0.00
Total Net Markup/Down	(\$14,331.50)	(\$14,331.50)	\$0.00	\$0.00	\$0.00

Various tabs within the application allow the user to view:

- Client/Matter demographics, including related parties
- Matter statistics
- Work In Process
- Accounts Receivable
- Billing summary/payment history
- Collections activities
- Trust/advance deposit balances

You can even view parties related to the client or matter right on the screen. In addition, depending on the optional modules purchased by the firm, an attorney can view docket/calendar events, collection activities and the location of important files from within the same screen.

Gain a Competitive Edge

Have you ever been put on the spot at your client's office with billing questions? Now, with Web MatterInquiry, you can bring up billing information via the Internet and answer client questions immediately.

Technical Information

Omega's web products are designed with a high level of security. The application supports SSL and is designed to work with firewall security. The web products are server-based and do not require an Omega Legal local client.

The web product server software can be installed as a standalone mini-web server (most common) or integrated into an existing IIS-based web server. The web product server supports secure (SSL-based) and non-secure connections on user-definable IP ports, for both Internet and Intranet access to the product. When deploying the web products as standalone, the web server requirement can be any PC that has a static external IP address or a port mapped through a firewall to a server within the network.

"Recent studies have shown that more than half of all law firm clients are dissatisfied with their firm's client service levels. Web MatterInquiry can help you gain a competitive edge."

Omega

Omega is a privately held Scottsdale-based company that provides mid-to-large size law firms an integrated financial and practice management software suite that sets the standard for return on investment, system performance and service. Since 1975, Omega has been solving critical business issues for law firms, improving their profitability, productivity and efficiency.
