

Cost Recovery Interface

Recover Costs and Productivity

It's one thing to have an automated cost recovery system, but it's another to actually recover those costs. Omega Legal's Cost Recovery Interface is the bridge that seamlessly turns captured costs into recoverable costs, providing you with a virtually immediate return on investment.

Import Costs from All Major Recovery Systems

Omega Legal's Cost Recovery Interface is commonly used to import costs tracked by:

- Equitrac
- nQueue
- Control Systems
- ISI Infortext
- Copyguard
- RightFax
- Tapit EX
- Pitney Bowes
- FedEx
- Mail Center Manager
- Lexis/Nexis
- Westlaw

This list is only a partial list. You can tailor the Cost Recovery Interface to import those costs directly into Omega Legal, as long as your third-party system or provider can produce an electronic ASCII data file containing minimal required fields.

Improve Accuracy and Productivity

Omega Legal's Cost Recovery Interface includes validation files to reduce the chance of costs being charged to the wrong accounts. Validation and data file imports can run automatically so that user intervention is dramatically reduced and only required to edit and reprocess errors.

Features & Benefits

- Standard and customized interfaces for all major cost recovery systems
- Two-way validation for improved accuracy
- Realize immediate return on investment
- Minimize administrative overhead

Omega

Omega is a privately held Scottsdale-based company that provides mid-to-large size law firms an integrated financial and practice management software suite that sets the standard for return on investment, system performance and service. Since 1975, Omega has been solving critical business issues for law firms, improving their profitability, productivity and efficiency.
