

iTimeKeep

Enter Time Directly from Your iPad or iPhone

Omega users can now enter their time on their iPad, iPhone, or Android device*. The iTimeKeep app, by Bellefield, lets you enter time from anywhere you are. Visiting a client? Traveling out of town? In court? Just take your iPad with you and never forget a minute of billable time again. With iTimeKeep, you can enter time directly from your iPad or iPhone and your entries automatically synchronize and register in Omega Legal in real time.

Access Your Matters Back at the Office

Your device has direct access to your matters database back at the office. Perform searches and pull up your recent matters just as if you were sitting at your desk.

Get Started Quickly

Setup for the integration is straightforward. Omega clients simply download the iTimeKeep app from the App Store and Omega sets up the integration on the database back-end. You can offer iTimeKeep to all the attorneys at the firm, or you can start with just a few attorneys. You can always add additional seats at any time. iTimeKeep has been designed with simplicity in mind and you will find yourself using it every day.

Capture Time That Slips Away

Today's attorneys work on the go—taking a call in the car, reading email while at home or eating out—and sometimes this billable time doesn't make it back to the office. iTimeKeep is conveniently with you, wherever you are, so that you can be more productive in capturing those smaller billable moments that tend to add up quickly.

"iTimeKeep's ease of use is beautiful and the voice recognition on my iPhone 4S is unbelievable. My time entries are more descriptive and thus are more likely to get approved by the billing review process instituted by most large insurance company clients."

David Schexnaydre, Founding Member, Pajares & Schexnaydre, Attorneys at Law

View Your Database Securely

Cloud-based iTimeKeep applies multiple levels of security to ensure that data is transferred safely from one system to another. All communications are secured with bank-grade security. And you can control who can use iTimeKeep to access your database.

Omega

Omega is a privately held Scottsdale-based company that provides mid-to-large size law firms an integrated financial and practice management software suite that sets the standard for return on investment, system performance and service. Since 1975, Omega has been solving critical business issues for law firms, improving their profitability, productivity and efficiency.

Bellefield is a leading innovator in Legal Mobile Technologies, bridging the gap between enterprise software, mobile devices, and desktop applications.

**There is no separate iTimeKeep app for the Android. Rather, iTimeKeep is accessed via the device's HTML5-compliant web browser, such as Chrome or Safari. Bookmarking the site creates an "app-like" icon on the device.*
